

SLUG AND SNAIL CONTROL PRODUCTS **(Fargro Horticultural Sundries Catalogue)**

This is a catalogue of products for Fargro's South East UK distribution area only.

Unless otherwise indicated these products are for professional use only; operators must have had training and be suitably qualified to use them.

For approved pesticide products, details of any Specific Off Label Approvals (SOLAs) or any use under the Long Term Arrangements for Extension of Use (LTAEU) have not been listed here.

Any approved pesticide product must be stored and used in accordance with the code of practice on pesticide use. Details on pesticide training, regulations, the code of practice on pesticide use, approvals and any allowable off label use are available from the Chemicals Regulation Directorate website - www.pesticides.gov.uk.

Information is believed to be correct at time of compilation but pesticide approvals and products change frequently. Products and or approval numbers listed here may no longer be valid. Similar products may replace those listed.

More information on the products may be available from the manufacturer's own website or contact Fargro.

If you require a specific product not listed here please contact us as we can usually help.

CERTIS RED 3

Active Ingredient: 3% w/w metaldehyde

Formulation Type: PT MAPP No: 14061

Harvest Interval: Up to 7 days depending on crop.

Control: Slugs and snails.

Crops: Natural surfaces not intended to bear vegetation, managed amenity turf, amenity grassland, in and around all edible crops. *Applications must not be made to cauliflower*

Application Method: Broadcast pellets.

Application Rate: 11.7 kg / hectare. The maximum total dose is 23.4 kg product per hectare per year. "In high risk situations, where additional treatments against slugs are necessary beyond the permissible 700g metaldehyde/ha/year total dose use an alternative slug control product not containing metaldehyde".

Fargro Code: SLUPL (15 kg).

DOFF SLUGOIDS SLUG KILLER BLUE MINI PELLETS

Active Ingredient: 3% w/w metaldehyde

Formulation Type: PT MAPP No: 11432

A home garden slug and snail killer

Fargro Code: SLUPA (12 x 450g).

DRAZA FORTE

Active Ingredient: 4% w/w methiocarb

Formulation Type: PT MAPP No: 13306

Harvest Interval: 7 - 18 days according to crop or limited by growth stage.

Control: Slugs, snails and strawberry seed beetle, with a reduction in leatherjacket populations.

Crops: These include: Brussels sprouts, cabbage, cauliflower, potato, lettuce (outdoor), spinach (outdoor), strawberry (outdoor), non edible crops (outdoor).

Application Method: Broadcast application.

Application Rate: 3 - 3.75 kg / ha according to crop. See label.

Fargro Code: DR10 (10 kg).

FERRAMOL MAX

Active Ingredient: 29.7 g/kg ferric phosphate

Formulation Type: PT MAPP No: 14463

Control: A bait for use as a molluscicide for control of slugs.

CERTIS

Crops: All edible and non-edible crops (outdoor and protected), amenity vegetation.

Application Rate: 7 kg / ha

Fargro Code: FERRM (7 kg).

NEMASLUG

Contains: microscopic parasitic nematodes *Phasmarhabditis hermaphrodita* in an inert carrier.

Control: For the biological control of slugs.

Crops: All.

Application Rates:

30 million treats:

- 100m² at single application rate (6 weeks protection).
- 200m² short duration crops or high pest pressure. Apply every 3 to 6 weeks depending on pest pressure.
- 600m². Apply every 2 to 4 weeks depending on pest pressure. A total of 3 applications recommended.

250 million treats:

- 833m² at single application rate (6 weeks protection).
- 1667m² short duration crops or high pest pressure. Apply every 3 to 6 weeks depending on pest pressure.
- 5000m² apply every 2 to 4 weeks depending on pest pressure. A total of 3 applications are recommended.

Comment: These are living organisms that require special handling and application procedures. A biological control for slugs. [For more information on biological controls see www.fargro.co.uk](http://www.fargro.co.uk) and look for "Biological Controls"

Fargro Code: . FGNEO (30 million), FGNEP (250 million).

SLUXX

Active Ingredient: 29.7 g/kg ferric phosphate

Formulation Type: PT MAPP No: 14462

Control: A bait for use as a molluscicide for control of slugs.

Crops: All edible and non-edible crops (outdoor and protected), amenity vegetation.

Application Rate: 7 kg / ha

Fargro Code: To order (20 kg).
