

ADJUVANTS AND WETTING AGENTS (Fargro Horticultural Sundries Catalogue)

This is a catalogue of products for Fargro's South East UK distribution area only.

Unless otherwise indicated these products are for professional use only; operators must have had training and be suitably qualified to use them.

For approved pesticide products, details of any Specific Off Label Approvals (SOLAs) or any use under the Long Term Arrangements for Extension of Use (LTAEU) have not been listed here.

Any approved pesticide product must be stored and used in accordance with the code of practice on pesticide use. Details on pesticide training, regulations, the code of practice on pesticide use, approvals and any allowable off label use are available from the [Chemicals Regulation Directorate website - www.pesticides.gov.uk](http://www.pesticides.gov.uk).

Information is believed to be correct at time of compilation but pesticide approvals and products change frequently. Products and or approval numbers listed here may no longer be valid. Similar products may replace those listed.

More information on the products may be available from the manufacturer's own website or contact Fargro.

If you require a specific product not listed here please contact us as we can usually help.

ACTIVATOR 90

DE SANGOSSE LTD

Adj No: A0547

Active Ingredient: 750 g/kg polyoxyethylene (5-8 EO) C10-C15 primary alcohol and 150 g/kg fatty acids.

Descriptions: An adjuvant approved for use with certain pesticides. A non-ionic surfactant/wetter/spreader.

Uses: Approved for edible and non-edible crops where an additional non-ionic wetter is recommended.

Fargro code: ACT (5 litres).

Young plants: 0.5 ml per litre, 200 ml solution per litre of media.

Continuous feeding: 0.05 ml per litre water once a week or with the feeding programme.

Misting cuttings: 0.15 ml per litre (freshly stuck cuttings with a fine mist).

Improved shelf life: 0.5 ml per litre – drench pots, hanging baskets and trays prior to transport.

Cut Flowers (Dyeing): 0.15 ml per litre to incorporate into the dye solution.

Balled and burlap stock: 1 ml per litre drench plants to improve wetting and re-wetting.

Fargro code: WETL (5 litres).

ATTRACKER

KOPPERT

Contains: A solution of several sugars (fructose, glucose and saccharose).

Description: The product lures insects particularly thrips from their sheltered places in the crop. Adding Attracter to the pesticides insects will be more exposed to the chemical spray resulting in significantly better control.

Rate of use: Outdoor crops 2 to 4 litres per hectare. Indoor crops 0.1 to 0.2% of spray solution (100 to 200 ml per 100 litres).

Fargro code: ATTRAC (5 litres).

CODACIDE OIL

MICROCIDE

Active Ingredient: 95% w/w vegetable oil

Adj No: A0629

Description: An adjuvant approved for use with pesticides. A sticking, wetting and extending agent to improve the performance of pesticides when sprayed.

Uses: Approved for use with most pesticides.

Fargro code: CODA (25 litres).

AQUAMIX G

FERTIL

Description: A non-ionic wetting agent for easy wetting and re-wetting of composts. A granular formulation including 70% vermiculite which acts as a carrier for the wetting agent. To be incorporated into growing media at mixing stage.

Rates of use: 250g/m³ young plants, 500g/m³ standard rate.

Fargro code: WETG (10kg).

OMEX SW7

OMEX HORTICULTURE

Active Ingredient: Silicon based wetter

Description: A wetter for use with foliar feeds.

Uses: For enhanced uptake of foliar applied nutrients.

Fargro code: OMEX1 (1 litre).

AQUAMIX L

FERTIL

Description: A non-ionic wetting agent for easy wetting and re-wetting of composts and plants. In liquid form. Improves water distribution in the growing media and availability to plants.

Rates of use: Preparing media for potting: 100 to 200 ml per m³.

Treated media already potted up (check there are no significant quantities of wetting agent in the media prior to potting up).

Standard rate: 1 ml per litre, 200 ml solution per litre of media.

SILWET /SLITHER

DE SANGOSSE

Active Ingredient: A 100% emulsifiable concentrate containing a minimum of 80% w/w polyalkylene oxide modified heptamethyl trisiloxane and a maximum of 20% w/w allyloxy polyethylene glycol methyl ether.

Adj No: A0640 / A0458

Description: For use only as an agricultural/horticultural/forestry wetting agent. An approved adjuvant.

Rates of use: Variable on label but with water volumes in excess of 400 l/ha 25ml/100 litres or consult specialist advisor.

Fargro code: To order (1 litre).

The formulation types listed are:

BB: Block Baits

CR: Crystals

EC: Emulsifiable Concentrate

EW: Oil in Water Emulsion

FU: Smoke Generator

FW: Gas Generating Pellets

GR: Granules

LI: Liquid, Specified

ME: Micro-emulsion

PA: Paste

PT: Pellets

RH: Ready to use

SC: Suspension Concentrate

SG: Soluble Granule

SL: Water Soluble Powder

SO: Soluble Concentrate

TB: Tablets

WG: Water Dispersible Granule

WP: Wettable Powder

USE PLANT PROTECTION PRODUCTS SAFELY. ALWAYS READ THE LABEL AND PRODUCT INFORMATION BEFORE USE.

All trade marks are acknowledged.
