

Compost Additives

Vermiculite

In composts, improves aeration and drainage whilst also providing nutrient buffering capacity. Widely used in propagation as a seed cover. Inert, sterile and neutral pH.
Available in 100 litre bags.

Available in three grades:

Fine 1-3mm

Fargro Code: VERF

Medium 2-5mm

Fargro Code: VER

Coarse 5-10mm **(To order)**

Perlite

This expanded volcanic rock is an excellent additive for composts to improve aeration and drainage. It is inert, sterile, and has a neutral pH.
Available in 100 litre bags.

Available in four grades:

Superfine 0-2mm

Fargro Code: SILF

Special Seed 1-3mm

Fargro Code: SILSG

Standard 2-5mm

Fargro Code: SILS

Supercoarse 3-6mm

Fargro Code: SILC

Aquamix Wetting Agent for growing media (liquid or granule)

Aquamix is especially designed for peat and bark based composts. This non-ionic wetter combines the performance of normal wetting agents and brings many extras.

- Lasting effects 6 months and plus.
- Unbeaten price/quality ration per m²

Aquamix can be used at the recommended rate by either incorporating into the media or in the watering system:

Reduce the soil/media impermeability.

Easy and simple to mix, even under cold conditions.

Better efficiency of chemicals and fertilisers.

No dry spots or excess water into the pots.

Fargro Code: 5 litres WETL

Fargro Code: 10kgs WETG

Swellgell

Application is easy as Swellgell is a free-flowing granular material. Simply mix in to any growing media followed by either irrigation or rainfall, this will activate the granules to rapidly absorb hundreds of times their own weight of water, so forming thousands of self-contained reservoirs giving the appearance of discrete firm gel 'chunks'.

Pack Size: 1kg

Fargro Code: SWEL

Also available in 25kg bags

Broadleaf P-4

Broadleaf P4 water-storing granules can be easily blended with any growing or planting medium, storing 100's of times their own weight of rain or irrigation water in the root zone, for use by plants as required.

Pack size: 2kg

Fargro Code: BROAD (2kg)

Available to order 10kg and 25kg

Sands & Grits

Silver Sand

Horticultural grade lime free fine silica sand. Nominal particle size <1mm. Used for seed and cuttings composts, top dressings and lawns.

20kg bag

Fargro Code: SAS

Potting Grit

Inert lime-free grit. Less than 5mm particle size. For use in potting compost to improve drainage. Also used as top dressing or alpiners and cacti.

25 kg bag

Fargro Code: GRCH

SHL Coarse Grit

Inert lime-free grit. Less than 10mm particle size. Used in potting composts where very rapid drainage is required.

Can be used for top dressing pots.

Large bag

Fargro Code: GRCS

Coarse Grit

Idea for: Alpiners and rock plants

Cacti and succulents

Top dressing pots and planters

Rock and scree gardens

Aquatic plants

Greenhouse benching

Aquaria and pools

20kg bag

Fargro Code: GRCHRH
