

Grodan stonewool products can be manufactured in many forms, e.g. slabs, blocks, matts, rolls, cells, granulates. This makes it possibly the most versatile growing medium available. For 30 years Grodania has built up considerable experience in working with Grodan substrates. This experience is constantly updated through the latest knowledge achieved through our interactive advisory team.

Propagation

Fargro Code:	Product	Dimensions	Hole size (mm)	No/Box
GDSN	AO25/40	25 x 25 x 40mm	6/15	6000
GDSV	AO 36/40	36 x 36 x 40	6/15	2940

Other block and hole sizes are available. Ask for details.

Growing Blocks

Fargro Code	Product	Dimensions (mm) L x W x H mm	Hole size (O/depth)	No/Box
GDTA	DM 4G	75 x 75 x 65mm	40/35	216/Box
GDC65	DM 6,5G	100 x 100 x 65mm	40/40	216/Box
GDC65H	DM 6.5G	100x 100x 65mm	27/35	384/Box

Grodan Vital

A single-season Grodan Vital slab is the answer for the grower looking for a reliable substrate that facilitates a simple watering policy. The Grodan Vital enables the grower to vary water content within a bandwidth of 55-78% (day level). If the quantity of watering ever proves to be insufficient, Grodan Vital can be resaturated fast. The Grodan Vital slab also prevents overwatering: WC is kept from rising too quickly, eliminating the need for a balanced watering strategy.

Fargro Code	Product	Dimensions LxWxH	Packing	Per Pallet
GDTOF	VITAL	1000 x 150 x 75	Wrapped	136 pallet
GDTOK	VITAL	1200 x 150 x 75	Wrapped	136 pallet

Grotop Master - One year life

Growers who use professional water management to steer plants to vegetative or generative growth need look no further than the single-season Grotop Master slab. The growers gets maximum yield from the crop all year round by adjusting the water content to the requirements of the season.

Fargro Code	Product	Packing	Qty
To order	GROTOP	1000 x 150 x 75	Wrapped
To order	GROTOP	1000 x 200 x 75	Wrapped
To order	GROTOP	1200 x 150 x 75	Wrapped
To order	GROPTOP	1200 x 200 x 75	Wrapped
To order	GROTOP	1330 x 150 x 75	Wrapped

136 per pallet

GRODAN® Single Block System

- is the perfect "tool" to optimise your propagation.
- comes in prefilled trays and is easy to use.
- has excellent water holding capacity and pore space making it easy to establish the right water and air ratio for your specific crop.
- allows you to apply liquid fertiliser at the right time and ratio.
- is clean, reducing pest and disease management needs.
- makes transplanting simple with plant and media in one unit.
- provides you with the technical service and support that has backed our products for more than two decades.

GRODAN® rockwool products developed to give your plants the **OPTIMUM** start.

SBS (Single Block System) 18 trays/box

Fargro Code	Product	Dimensions (mm) L x W x H mm	Hole size (O/depth)	Qty
GDSF	SBS 36/77	36 x 36 x 40	6/15	1386/Box
GDSU	SBS 25/150	25 x 25 x 40	6/15	2700/Box

Granulates

GRODAN® granulates are used to alter the air or water holding character of peat based composts or can be used as complete growing media. The water repellent for (BU) increases aeration in peat composts and the water absorbent for (GU) increases the water retention. GreenMix is a complete pH buffered growing media containing a mixture of the two forms.

Fargro Code	Specifications	Loose volume	Weight
To order	M-GU-10	Water absorbant fine grade	300 L 20kg
GDSH	M-GU-20	Water absorbent medium grade	450 L 20kg

Grodan Water Meter

Exceptionally accurate measurement of water content (0-100%) and EC (0-8 mS/cm)

Automatic calculation of the average and the deviation of water content, EC and temperature of each set of measurements.

Accurate measurements in all varieties of GRODAN slabs, easily adaptable via the menu.

Compact and easy-to-use design.

Considerable time saving in the collection and processing of data.

Tracing possible causes for differences between slabs or zones.

Tracing temperature differences in water/spring by measuring slab temperature.

High capacity, long life battery.

Safety first - after use, the sensor pin can be inserted into the meter.
