

# Shading Paints & Glass Cleaners

## GS-4 Glass Cleaner

GS-4 is a glass cleaner suitable for glass greenhouses. GS-4 contains no hydrogen fluoride gas and has virtually no vapour effect. This is why GS-4 is safer for humans and the environment.

Dilution Rate: From 1:10  
For medium solid glass

Fargro code: GS4  
Pack size: 25 litres

## Coolglass

**FORMULATION TYPE:** Emulsion

**USAGE:** White shading material for glasshouses, hospitals, factories, offices and schools.

**APPLICATION METHOD:** Coarse spray or brush

**APPLICATION RATE:** 1 litre of Coolglass to 16 litres of water to cover 200 m<sup>2</sup>. Apply evenly to the glass. At the end of the season it is easily removed with a dry cloth.

Fargro Code: CO5  
Pack size: 5 litres

## Mardenkro Redusystems - ReduSol, ReduHeat & ReduClean

**Professional, removable, liquid shade paint systems for application to horticultural greenhouses.**

**ReduSol** is a liquid shading agent for use in greenhouse horticulture that can be easily removed with ReduClean after the season. The shading effect can be adjusted by selecting the dilution factor that fits the respective crop.

ReduSol is highly resistant to wear.

This is reduced when higher dilution ratios are used.

Dilution Rate 1:1.5 to 1:10

Fargro Code: REDUS

Pack Size: 20 kgs

**ReduHeat** is a liquid shading agent that transmits a significant amount of growth light (PAR) and reflects radiation (NIR) to a large extent. This makes ReduHeat especially suitable for those crops that require moderate to light shading against heat radiation as well as a maximum amount of growth light.

By changing the concentration of ReduHeat in the solution being applied, the shading effect can be adjusted to the needs of the crop. When using a very low concentration the wear resistance of ReduHeat can be diminished. ReduHeat can be easily removed with ReduClean after the season.

Dilution Rate: From 1:2 to 1:5

Fargro Code: REDUH

Pack Size: 15 kgs

**ReduClean** is developed for removing ReduSol or ReduHeat from glass, plastic film, polycarbonate or acrylate. After a period of shading you wish to gain optimal light in your greenhouse. By removing ReduSol or ReduHeat from your greenhouse you will regain a clear roof. ReduClean is easy in use and not harmful for humans and the environment.

Together with ReduSol and ReduHeat forms ReduClean the 'perfect shading system'.

Dilution Rate: From 1:7

Fargro Code: REDUC

Pack Size: 10 litres

Fargro Code: REDUC25

Pack Size: 25 litres
