

# Braam Paper Pots

**Produced by Braam (Holland), part of the Van der Knaap Group of companies. Fargo are exclusive agents for Braam in the UK and Eire.**

Braam have been involved in the production of paper pots for many years supplying large European nurseries. Being part of the large Van der Knaap Group ensures that the appropriate level of investment in paper pot production on a European scale is in place.

Using Ellegaard equipment to produce the pots, Braam can assure you, the grower, of a quality product.

The paper supplied from Ellegaard is environmentally friendly and suitable for short term crops. Plant roots can easily penetrate the paper leading to a strong healthy root system.

## Tray Choice

A wide range of tray sizes is available to suit your own particular situation and requirements.

Trays are available from all leading manufacturers and we should be able to supply the tray of your choice.

### Popular tray sizes

104 cell	84 cell
54 cell	32 cell

### Popular Paper Braam paper pot sizes

30mm, 40mm, 60mm

## The Substrate in your Braam product

Produced from the very best quality Tref raw materials. Although standard mixes, based on peat and perlite are very popular other options such as coir, bark and vermiculite are available.

Tref are one of the largest and most progressive substrate companies in Holland supplying mixes for liner to

main crop production in ornamentals and in the vegetable/salad sectors.

Our experiences with Tref over the past 5 years gives us the confidence that the Braam mixes are optimal for paper pot production with ideal air filled porosity and stability of structure.

## Deliveries

Orders placed at Fargo are generally delivered within 7-10 days. We can supply on pallets, shrink wrapped, with strong corner posts, reducing potential damage, as part or full loads. We can also supply in boxes - ask for details.

## What do the growers say

*excellent and consistent results over a wide range of genera, and has in some cases increased our percentage rooting on some crops by upwards of 10%".*

*"As we continue to increase our propagation volumes, the Braam plug will continue to play a vital role in helping Northern Liners to achieve a quality plug product, both for internal use and for the ever increasing demands for root-cutting sales".*

Chris Connah,  
Nursery Manager

## Using Braam Plugs

*"At Northern Liners we produce 1 million cuttings per annum, using a combination of cutting material, seedlings and ex agar material to achieve this. We are now in our third season with the Braam plug, and we have found it has given*

All paper is environmentally friendly and will decompose.

All trade marks are acknowledged.

Braam, Ellegaard, Tref are registered trade marks.
